One Car Garage  
Assembly Instruction by  
Laser Dollhouse Designs

**NOTE 1:** Please do a dry assembly using only tape to hold house together. This will get you familiar with parts, location, and fit. This also gives you a chance to visualize how you want to approach the build. Also read each step and adhere to items that should not be glued till a later time..

Materials for build;

1. Wood glue, you may use Titebond, Elmers, tacky or any good wood glue. Tacky wood glue dries clear and is preferred.
  2. Masking tape to hold house in place during dry assembly and gluing.
  3. Utility knife if needed for trimming.
  4. 220 grit sandpaper.
  5. Wood Filler
  6. Paint, any acrylic paint.
- Hardware store carry sample cans which are not expensive and are enough.
7. WD40 for garage rails and windows rails.

## Windows Assembly

Step A. **(Complete this after painting parts)** Take the four windows and completed painting. (figure B1). Turn window over (fig. B2) next apply a very thin coat of glue to inside edge of pane and remove the plastic cover from one glass (B3). Install glass carefully into the window, figure B4. press down and hold for 1 min as glue secures to glass. Complete same for next window and set aside to dry fig B5.

## Door Assembly

Step B. **(Complete this after painting parts)** Remove foot cross frame on bottom of door and separate the door from frame. Next paint the frame, door, interior window frame, and foot cross frame, figure B6. Turn door over and apply glue to outside of glass insert, figure B7. Next install remove protective cover from glass and install glass into door, figure B8. Next install interior frame onto door, figure B9. Finally install door into main frame and install foot cross frame, figure B10.

## Garage Assembly

Step 1. Paint all walls, staircase, landing rails, and garage parts after completing dry assembly.

Step 2. Turn 2<sup>nd</sup> floor upside down (fig.1) and install garage door guide rails facing inward as seen in figure 2. Install next the garage door into the rails and slide door all the way to the rear as seen in figure 3.

Figure 1

Figure 2

Figure 3

## Garage Assembly

Step 3. Locate base marked 1A thru 1D and install wall 1C into the base, next install 2<sup>nd</sup> floor with garage into base and align to wall 1C as seen in figure 4. Make sure wall aligns to front of the 2<sup>nd</sup> floor.

Figure 4

Step 4. Install wall 1B as seen in figure 5, again make sure wall and 2<sup>nd</sup> floor align at front as glue dries. Next install window and side door as seen in figure 6 Next install interior frames to the door and windows, figure 7.
